

RPM DIGITAL

PRINT & CROSS-MEDIA

Using the FSC® logo

So you want to print the FSC logo on your job. What do you do?

1. **Tell us!** We have to inform our certification body each time we use the FSC logo and FSC jobs follow a different paper trail through the building to normal jobs.
2. **Choose which FSC paper to use.** This will be done in consultation with your RPM account manager. Our FSC paper range includes most types, please refer to our Product Group List for overall categories.
3. **Decide on the label.** FSC has very strict rules on the style and placement of its logo, which must be adhered to at the design stage or the job will be invalid. We provide the FSC label artwork in-house as it will contain our trademark licence code. It is also possible to print with your own code if you have one, please ask. We will then forward an approved proof to you for confirmation before printing.
4. **Your invoice and delivery note** will show details of the FSC claim that relates to your job.

To check the validity of our certification click [here](#) and navigate to the bottom of the page.
